Note: In playing this game, be aware of food allergies that your students may have.

PLAY

Have your host ask two students to come up front to see who can guess the most flavors correctly. Once they come up, each student should be given a blindfold and your host can determine who goes first or you can flip a coin. Once the blindfold is on, one player will taste their first pair of snacks, and then have to say what the flavors may be. One point for each correct answer, and you can play the first to three points wins.
